REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims renumbered to 1, 19 and 35 among other things teach the limitations of a method, system with means for, and an embodied computer program "determining transactional quality of service values and using those values when responding to a request from a client; annotating a routing token with the TQoS values from the server to the client enabling the client to send the TQoS values with subsequent client messages to the server" for providing improved quality of service in a computer networking environment. These limitations in combination with the 'relationship between the client and server' and further defined by dependent claims 'TQoS values denote priority, bandwidth, and cookie information; and modifying the URL from the header,' are allowable.

The prior art does not teach the cited limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
